Dirección visual propuesta

Una identidad editorial clara y cálida para explicar hardware con rigor sin parecer una tienda ni una web de gaming estridente.

PC HARDWARE, MADE CLEAR

Understand your PC. Build with confidence.

A calm editorial voice, useful diagrams and transparent evidence. The visual system stays readable from the first question to the final buying decision.

PROPOSED BRAND CHARACTER

Clear · Practical · Evidence-led

Core & Pixel remains a working name.

No final logo or domain decision implied.

COLOR PALETTE

Midnight	Signal teal	Warm amber	Paper	Cool mist
#142B3B	#167E78	#E6AA4E	#F7F8F5	#EDF2F4

TYPE AND READING

Plain-language headings

Use a clean sans serif with a distinct hierarchy. Article body copy should remain comfortable on laptop and mobile screens.

H1 — One question per page

H2 — Answer first, explain next

BODY — Short paragraphs. Define terms once.

META — Updated date · source links · author

PAGE RULES

01 Answer the reader's immediate question before adding background.

02 Place citations beside claims; show dates where product data can change.

03 Give USD and EUR their own retailer and country context.

04 Keep tables quiet; use labels and sources, not unexplained scores.

05 Reserve modest ad spaces after useful content has started.

ACCESSIBILITY TARGETS — Readable contrast · visible keyboard focus · 16-18 px body text · descriptive table labels · 44 px touch targets

PC HARDWARE, MADE CLEAR

Understand your PC. Build with confidence.

Straightforward guides to CPUs, graphics cards and the parts that make a PC work - with every technical term explained.

Start with the basics

Browse CPU rankings

NEW TO PC HARDWARE?

Start here

A short path from learning the parts to checking a build.

01 **Learn the parts**
CPU, GPU, memory and storage

02 **Check compatibility**
Fit, power, sockets and BIOS

03 **Compare evidence**
Understand tests before buying

Choose your next step

Clear answers for the parts you are comparing, building or upgrading.

LEARN

Understand CPUs

Cores, threads, clock speed and what the numbers mean.

CPU cores vs. threads

The plain-English difference and what it means for common tasks.

→

DESIGN NOTE

CPU hub / desktop

The hub serves as a learning path and routes readers to distinct explanatory, comparison and buying pages.

CPU EXPLAINER

CPU cores vs. threads: what each one does

A clear guide to physical cores, software threads and why a bigger thread count does not automatically mean a faster PC.

CORE & PIXEL · GUIDE · REVIEW DATE SET ON PUBLICATION

THE SHORT ANSWER

A core is processing hardware inside the CPU. A thread is a sequence of work the CPU schedules. Some cores can work on more than one hardware thread at a time.

ADVERTISEMENT SPACE | RESERVED

What is a CPU core?

Think of a core as a worker inside the processor. More physical cores can help with work that can be split into parallel tasks, but the software and CPU design still matter.

EXAMPLE: SMT-ENABLED PROCESSOR

Illustration only - not every CPU exposes two hardware threads per core.

DESIGN NOTE

Explainer article / desktop

Answer-first structure, readable table of contents, a simple labelled diagram and a restrained ad reservation.

CPU RANKINGS

Desktop CPU performance ranked by workload

Gaming and productivity results are kept separate. Every row links to its test source and conditions.

HOW THIS PAGE IS BUILT

Multiple attributable test sources · comparable workloads · source dates · limits explained

Read our ranking method

Gaming | Productivity | Value

Gaming results

Example layout - product data is intentionally blank until source review.

Rank	Processor	Test category	US price	EUR price	Evidence
--	**Product model** No recommendation shown in this design preview	Gaming 1080p	$ --	€ --	Source / suite / date
--	**Product model** No recommendation shown in this design preview	Gaming 1440p	$ --	€ --	Source / suite / date
--	**Product model** No recommendation shown in this design preview	Gaming 4K	$ --	€ --	Source / suite / date

PRICE CONTEXT

Store, country and check date accompany each USD or EUR listing.

ADVERTISEMENT SPACE | RESERVED

DESIGN NOTE

Ranking and data table / desktop

The ranking layout makes workload, source trail and local price context visible. Placeholder rows contain no product claims.

Diseño móvil

Tres vistas estrechas: portada, artículo y ranking. La jerarquía se conserva y los datos siguen identificables sin depender del color.

HOME

Lead with the reader's first question.

MOBILE RULES

Type
Keep body text comfortable and paragraphs short.

Navigation
Use a labelled menu control and clear focus.

Tables
Stack row details with labels; never hide units.

Ads
Reserve space after useful content begins.

Touch
Keep links and controls easy to tap.

Images
Use diagrams with captions and alt text.
